

LAKE AVENUE PEDESTRIAN ACCESS IMPROVEMENTS PROJECT

Fact Sheet

January 2024

Project Description

- This project provides streetscape improvements to enhance pedestrian access and circulation along a 1.06-mile segment of Lake Avenue, from the Gold Line Station at Corson Street south to California Boulevard. The addition of pedestrian lighting, controlled mid-block street crossing and accessibility improvements at new and existing signalized intersections will enhance the overall pedestrian experience through this busy commercial corridor.

Project Improvements

- New traffic signal at Granite Drive
- Signalized mid-block crossing south of Cordova
- In-fill pedestrian scale lighting
- Curb extensions and ADA compliant curb ramps
- Sidewalk widening on Lake north of Colorado

Current Project Schedule

- Potholing and installing signal conduits at mid-block traffic signal between Cordova and Del Mar
- Potholing and installing street lighting conduits beginning at Corson working southerly to California

Project Status (1/10/2024)

The City's contractor, Elecnor Belco Electric, Inc. remobilizing for construction January 2024 beginning with construction survey, potholing existing substructure utilities and directional boring of signal and street light conduits.

Project Timeline

- Construction Mobilization Date: January 2024
- Anticipated Completion Date: Summer 2024
